In all probability you have read the full page advertissment " WHY DOES THE WORLD HATE AMERICA ?

The Public Service by Mr. Brewer is somewhat one-sided. I have the profit to know the world to some extent. That the world " hates " America is certainly NOT true.

Monsieur Cartier and Mr. Brewer simply do not pose the alternative: what would have happened if the U.S.A. had not spent that money. There is a straight answer on that question : communism all over Europe and millions of unemployed in this country.

In the third column I read : " In Europe, the response to American wealth is an attitude of intellectual hauteur."

To even a great extent this may be true, but is this " Hauteur " really so high ? Two years ago I had a conversation with Louis de Broglie in Paris. I needed some information on wave mechanics. He recommended me some of his lesser known books. When I asked him afterwards : " what did carry his waves, as it could not be a non-describable ether, he could not answer.

I think that Professor Reiser and myself have worked out something in the last seven years, by which we could diminish to some extent that " hauteur " in Europe.

About the white race there is a great deal of truth in. Christians and Jews are not exactly loved in the colored world. I don't say that there is no reason at all for it, but a lot of people forget that in the olden times, let we say " Capitalism " did not handle its own labor much better as the colored labor in the colonies.

But would Indonesia where it is now a mess and India where it is not much better or even the U.S.A. if the Indians had had the rule here, have been what they now are.

What the full page advertissment shows more than anything else is : that the U.S.A. with the best system in the world could never defend it, due to the incapacity of Western Science to answer, what Captain Horn called " profound " questions. WHY freedom ? WHY Free Enterprise ? ETC.

I know the Far East pretty well. One thing which its intellectual population certainly does not understand is the meaning of Freedom. They simply find it nonsense. Put an untouchable in a motor car ? The only way it would appeal would be via, what also they call " science." And this is exactly what we have been unable to do.

With money however you can do a lot, also place such advertissments as blunt statements, but I could give more reasons WHY the U.S.A. with these \$ 52 billion give-away pursued knowingly or not knowingly the most selfish and policy and thereby serving not only the interest of the world but at the same time its own interest. In all history ever did show.

Respectfully yours,
B.G.H. Vanderjagt.
